Professional Summary

Infrastructure-focused IT professional with hands-on experience designing, deploying, and operating hybrid environments. Proven ability to build and run networks, implement Active Directory (on-prem and hybrid), and deliver secure, scalable solutions including Azure Virtual Desktop (AVD). Comfortable owning environments end-to-end across networking, systems, and cloud in small-to-mid sized organizations.

Core Skills

Active Directory (on-prem/hybrid), Azure Virtual Desktop, Windows Server

Networking (VLANs, routing, switching, firewalls), pfSense (HA/CARP), Cisco Catalyst

Microsoft 365, Azure, virtualization (Proxmox)

Linux (10+ years; desktop/server/embedded)

Wireless (UniFi, Arista WiFi)

Scripting & automation (Bash, PowerShell, JavaScript integrations)

Professional Experience

Director of IT — Integro 212, LLC / Tristate Buildings (2021–Present)

- Managed infrastructure supporting 70+ users across 8+ locations spanning on-prem, virtualized, and cloud environments.
- Rebuilt and standardized network infrastructure, improving reliability, segmentation, and security.
- Designed and implemented VLAN-based network segmentation (5+ VLANs at largest site).
- Deployed and managed Active Directory environments, including hybrid integration with Microsoft 365.
- Architected and implemented Azure Virtual Desktop (4 hosts; up to 13 users, 5–10 concurrent).
- Designed resilient network architecture with high availability, CARP/failover, and redundant internet connectivity.
- Administered firewall, VPN, and access control policies using pfSense and ZTNA policies.
- Managed switching and wireless infrastructure (Cisco Catalyst, UniFi, Arista WiFi).
- Built and launched a Managed Service Provider (MSP) offering.

- Implemented practical backup and recovery strategies (VM snapshots, configuration backups, cloud retention policies).

Owner / Lead Technician — TrueGeek, LLC (2012–Present)

- Founded and operated a technology services business spanning device repair and IT services.
- Performed advanced diagnostics and board-level repair (microsoldering, chip rework).
- Provided B2B IT services including network installation, optimization, and troubleshooting.
- Designed and deployed small business infrastructure including networking and security camera systems.

Key Projects

- Azure Virtual Desktop Deployment: Designed and deployed AVD environment including host pools, user profiles, Azure File Storage, and access controls.
- M365 to Google Workspace Migration: Migrated a full company (15+ users) with zero business-hours downtime and no data loss.
- Hybrid Active Directory Deployment: Built and transitioned environment to hybrid AD for cloud identity integration.

Certifications

Certifications available upon request

Additional

- Strong ability to translate business requirements into technical solutions
- Experience supporting small to mid-sized business environments
